## Confirmation letter about the product TOYOPUC-PCS-J of company JTEKT CORPORATION

To whom it concerns,

The safety related field bus controller TOYOPUC-PCS-J ('the product') of company JTEKT CORPORATION was initially assessed in 2008 and certified on 2008-08-29 by TÜV Rheinland Industrie Service GmbH.

According to the certificate holder's statement no safety relevant issues from field operation were reported. Furthermore the product was not modified since the last assessment and certification. Thus the product can be considered as proven in use and it also can be assumed that the product is sufficiently free from systematic failures.

From the Certification Body's point of view, the meanwhile updated standards do not compulsory require a modification of the product in order to retain the level of functional safety as stated in the current certificate no.: 968/EZ 314.06/13, thus the product further fulfils the stated level of functional safety after expiration of the before mentioned certificate on 2018-05-29.

The order for a re-certification of the product based on the actual standards has already been placed and the product is currently under review for re-certification. Re-certification is planned to be finalized by the end of October 2018.

If you have any questions do not hesitate to contact Mr. Buchwinkler.

Best regards from Cologne and Berlin
