Requests for Customers Using Windows 10 Pro 2004 or Later PCs

■ Overview

When using TOYOPUC software such as PCwin on a PC equipped with a Windows 10 Pro version 2004 or later OS, IME-related problems (*1) of the OS may cause the software to become unresponsive and cause a phenomenon that accepts mouse/key operations.

*1: <https://docs.microsoft.com/en-us/windows/release-information/status-windows-10-2004>

<One of the procedures to be followed: PCwin2>

■ Requests to customers

Please change the setting to enable compatibility in Microsoft IME setting as follows.
