

■ TOYOPUC-Nano Safety Performance Specifications

Item	Specifications	
Safety category	ISO13849-1 PLe IEC61508 SIL3	
Program method	Stored program method	
Program control method	Cyclic arithmetic method	
I/O control method	Image register method	
Program language	LD(+ FBD)	
Scan time	Master	20ms
	Slave	5.0ms
Response speed	Master	Depending on configuration and settings. (See the instruction manual)
	Slave	9.7ms
Program capacity (object size)	Master	512KB (Safety only)
	Slave	64KB (Safety) + 64KB (standard)

■ TOYOPUC-Nano Safety External Dimensions

(When W=330 is used with up to 9 IO modules, protrusion is not included.) Unit: mm D=80

■ TOYOPUC-Nano Safety Lineup (Please contact your sales representative for the release date.)

Equipment	Name	Type	Specifications	Remarks	
Safety slave module	Without SN-I/F	RS00IP	TUU-1086	24 V DC system power input, system power supply to IO module USB I/F (for peripherals) Memory: Safe 64 KB, standard 64 KB EtherNet/IP (safe communication: CIP safety): With 1 port HUB	
	With SN-I/F	RS01IP	TUU-1087	24 V DC system power input, system power supply to IO module USB I/F (for peripherals) Memory: Safe 64 KB, Standard 64 KB EtherNet/IP (safe communication: CIP Safety): with 1 port HUB Serial communication: SN-I/F, MODBUS-RTU (selective)	
Safety input/output module	16 points input	IO-1600S	TUK-1088	24 V DC 16 points input (Cat.4, Cat.2) dry contact input, OSSD input (-common), semiconductor input (-common) (configurable at a minimum increment of 1 point from peripheral)	PCS-J S-IN(LC) Terminal block compatible
	16 points input	IO-1600SE	TUK-1144	24 V DC 16 points input (Cat.4, Cat.2) dry contact input (inverse input specification)	PCS-J S-IN(E) Terminal block compatible
	16 points FET output	IO-0016S	TUK-1090	24 V DC 16 points FET output 0.3A/point (Cat.4, Cat.2) or 16 points FET output 0.5A/point (Cat.4, Cat.2) or 8 points FET output 0.5A/point (Cat.4, Cat.2) (select one from the peripherals)	One point for Cat.4, Cat.2 PCS-J S-OUT Terminal block compatible
	8 points input 6 points FET output	IO-0806S	TUK-1089	8 points DC 24 V input (Cat.4, Cat.2) 6 points FET output 0.5A/point (Cat.4, Cat.2)	One point output, support for Cat.4, Cat.2 compatible with PCS-J sub-MON
Standard input/output module	16 points input	IO-1600N	TUK-1091	24 V DC 16 points input (8 points/common) ... nonpolar	
	16 points FET output	IO-0016N-P	TUK-1092	24 V DC 16 points (8 points/common) 0.5A/point 4A/common (+) common with short-circuit protection function	
Base	BASE	TUR-1093		Base (connection between safety slave and input/output module or input/output modules)

Information presented in this brochure is subject to change without prior notice.
 Available machines or machines shown may vary depending on optional equipment or periodic design changes.
 The export of products defined as restricted commodities (or technologies) under Japan's "Foreign Exchange and Foreign Trade Act" requires an export license issued by the Japanese Government. Furthermore, similar licenses may be required for re-transfer, re-sale or re-export of such products, therefore please do not fail to contact JTEKT in advance.

TOYOPUC-Nano 10GX TOYOPUC-Nano Safety

New Architecture Next Operation

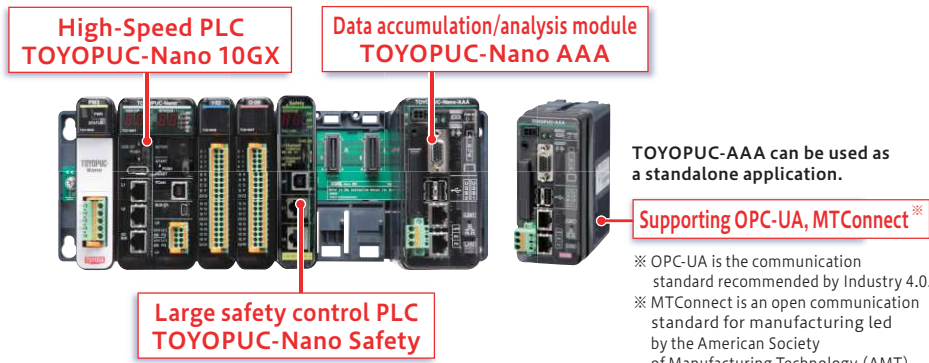

Smart Equipment with Three Brains

New Architecture

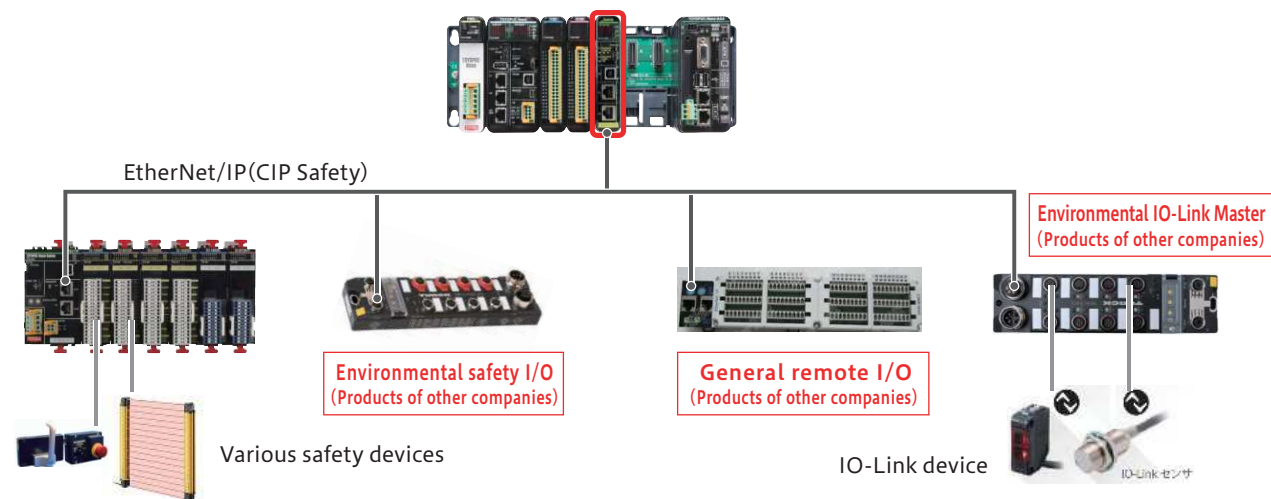

New High-speed Platforms and Three Brains. Realization of Fast and Advanced Big Data Processing

- Six times faster than PC10G (Comparison of processing speed of basic instructions)
- Advanced analysis with parallel use of data accumulation/analysis module
- Strongly supported IoE with compatibility with OPC-UA and MTCConnect as a new function
- Seamlessly connected standard data, secure data, and big data with the common platform

Next Operation

Reduced Wiring Due to Mixed Safety and Standard I/O

Programming tool

Item	Type	Function
PCwin2	TJA-1137	Japanese version No CD
	TJA-1138	English version No CD
PCwin-Safe2	TJA-1139	Japanese version No CD
	TJA-1140	English version No CD

Function details:
 PCwin for TOYOPUC-PC10G Series
 PCwin 2 for TOYOPUC-Nano 10GX
 PCwin -Safe for TOYOPUC-PCS
 PCwin -Safe-J for TOYOPUC-PCS-J
 PCwin -Safe-Plus for TOYOPUC-Plus Safety
 PCwin -Safe-Nano for TOYOPUC-Nano Safety

PCwin2, PCwin-Safe-Nano

- Tool compatible
- Operability and data are conventionally compatible

TOYOPUC-Nano 10GX Performance Specifications

Item	Specifications
Programming language	Ladder (LD), SFC, FBD, ST
Processing speed of basic instructions	2.6 ns to /instruction
Instruction words	20 basic instructions, 23 timer counters, more than 700 applied instructions
External input/output points	4,096 points
Internal input/output points	86,016 points (4,096 points × 3 + 8,192 points + 65,536 points)
Keep relay points	6,400 points (768 points × 3 + 4,096 points)
Timer function	9,728 points in total
Counter function	1 to 65,535 (2,560 points × 3 + 2,048 points)
Link relay points	38,912 points (10,240 points × 3 + 8,192 points)
Rising/falling edge detection	11,776 points (2,560 points × 3 + 4,096 points)
Data register	164KW (12KW × 3 + 128KW), Flash registers: 4Mbyte extended buffer registers: 256 KW direct designation is available.
Link register	6KW/16 bits (2KW × 3)
Number of link modules	Up to 24 links

TOYOPUC-Nano External Dimensions

(When 8BS is used, protrusion is not included.)

TOYOPUC-Nano Lineup

Equipment	Name	Type	Specifications
24VDC power supply module	PW2	TUV-6942	Rated 24 V DC tolerance 20.4 to 28.8 V DC, 30VA or less (with a diagnostic function)
CPU module *1	10GX	TUC-1157	Communication: 2 Ethernet ports and 2 serial ports
Input module	16 points input	I-12	TUK-1006
	32 points input	I-22	TUK-6948
	Switch input	SW	TUK-6965
Output module	16 points contact output	O-12	TUK-1007
	16 points FET output With short circuit diagnostics	O-18	TUK-1008
		O-19	TUK-1009
	32 points FET output With short circuit diagnostics	O-29	TUK-6947
		O-2A	TUK-1041
		O-2B	TUK-1042
Input/output module	32 points input/output With short circuit diagnostics	IO-328	TUK-1005
		IO-329	TUK-6952
Base	10 base	10BS	TUR-1043
	8 base	8BS	TUR-6943
	6 base	6BS	TUR-6966
	4 base	4BS	TUR-6967
Communication module	2 ports ether	2ET	TUU-6949
	Device net	DL	TUU-6956
	2 ports link	2ML	TUU-6954
	Selector	SL	TUU-6955
Special module	High-speed counter	CT	TUK-6974
	Analogue input	AD	TUK-6975
	Analogue output	DA	TUK-6976
Safety module *1	Safety master	Safety	TUC-1085
Edge analysis module*4	Edge computer	AAA	TUK-6987-02

*1 Please contact your sales representative for the release date.
 *2 The O-18, O-19 output current should be less than or equal to 1A for the sum of addresses 0 and 1, 2 and 3, 4 and 5, 6 and 7, 8 and 9, A and B, C and D, E and F.
 *3 EtherCAT can only be used on one port, including the built-in CPU port.
 *4 As for details regarding the timing of adding OPC-UA and MTCConnect functions, please contact your sales representative.
